- **HSI** trend is Dual on 26<sup>th</sup>-27<sup>th</sup> March, trend is UP from 28<sup>th</sup> March-30<sup>th</sup> March
- **DAX** trend is UP till first half of 5<sup>th</sup> April
- **Stock Kesoram industries (cash price) NSE.** This stock look bearish as it has breached the monthly, quarterly, half yearly and yearly projected low. now this stock is heading towards 96.65 (cash NSE ) which is three years projected low (2016,2017 &2018 ) and if I am not wrong 96.65 is going to be the exact low of year 2018 (cash price NSE ) and there we can go massively long with close stop of 96.00 on daily close basis
- **Stock NIIT** (cash price )half yearly projected low (Jan-June) @83.70,Yearly projected low (2018) @72.05,2 years projected low (2017 &2018) @46.10,NIIT cash price is trading now @85.49 near to its half yearly projected low of 83.70 . If NIIT gives a daily close below 83.70 it will confirm it is heading to yearly projected low of 72.05 and once its gives a daily close below 72.05 it will confirm it is heading to 2 years projected low of 46.10,So immediately we have to watch the level of 83.70 (cash price NSE ) closely . Any daily close below 83.70 is bearish. Monthly projected low (March ) is 79.75 so possibility is next week it will go as low as 79.75 but won't give a daily close below 83.70
- **Stock Shalimar Paints** (cash price) NSE, half yearly projected low (Jan-June) @141.30 & monthly projected low (for March) is 141.30, Yesterday it went as low as 139.50 but closed above 141.30. So this stock is trading at very important level of 141.30. Any daily close below 141.30 is bearish otherwise bullish.
- **stock Ambuja Cement:**2 years projected low (2017 & 2018) @189.50,Yearly (2018) projected low @196.60,Half yearly (Jan -June ) projected low @219.25.So immediately this stock is trading near half yearly low, risk takers can go long around@ 219.25 to get a short lived sharp bounce with tight stop of 219 on day closing basis but eventually this stock will fall to 189.50-196.60 (most ideally low of year 2018 should come right at 189.50) and that should be a great buying opportunity.
- **stock Tata Coffee Ltd** (TACO) NSE/BSE.Yearly projected low (year 2018) @103.30,Half yearly projected low @106.90.But the most important level is 114.80 which is 2 years projected low for year 2017 & 2018.go long in stock Tata coffee Ltd (NSE/BSE) around @114.80 (cash price ) with stop of 103.20 on day closing basis

- **Gdx vectors gold miners.** 25.66 is the strongest Astro resistance for entire 2018. I doubt gdx will be able to go above 25.66 in year 2018, 25.43 is the strongest Astro resistance till 30th June 2018. Immediately 22.26 is the strongest Astro resistance ,But if I look at the long term picture in case gdx falls to 16.66 it is a great buying opportunity with upside target of 36.05. As immediately I am expecting uptrend in precious metals till 19th/20th of April in case gdx hits there 25.43-25.66 go short with stop of 26.89 on day closing basis
- **Stock Oracle Corporation (ORCL) (NYSE)** 2 years projected low is 41.89, Annual projected low is 42.79, Half yearly projected low is 44.07, Quarterly projected low is 45.00, Monthly projected low is 45.27, go long @44.78 with stop of 44
- **Stock Face book:** 157.85 is the projected low for the month of March and 158.87 is the projected half yearly low for the period January-June 2018. So if I am not wrong we will see a strong bounce in this stock as soon as it hits the price area of 157.85-158.87. If I look at the long term picture projected low for year 2018 for stock Face book is 145.99 and projected annual high is 214.72. stock Face book is a great buying opportunity @157.85-158.87 with stop of 145.98 on day closing basis with upside target of 214.72
- **stock HMT (bse/nse).** Quarterly projected low (Jan-March) @29.10. Half yearly projected low (Jan-June) @29.10. Yearly projected low (year 2018) @27.25. So immediately I don't see this stock is going below 27.25 .Go long in this stock @29.10-27.25 with stop of 27.00

- **Stock Punjab National Bank** is bound to touch 78.75 in year 2018 and that should be the exact low of year 2018, there we will buy this stock aggressively. (trend is UP till 2<sup>nd</sup> April) Future dates where we can see at least 5% up move in stock Punjab national bank.
